

Each **PLAYER** will carry **THEIR OWN** individual handicap. The **TEAM** handicap will therefore be calculated by adding together the handicaps of the **3 players playing ON THE NIGHT** (plus the handicap for the doubles).

The individual player handicaps have been calculated as follows: Handicaps are based on the division played-in during the **2015-2016** season, and the % games won in that division. If a team is promoted/relegated, the handicap is still based on the above. If a **player** did not play in the league last season (ie. no stats available), then their handicap is based on the division that they are playing in **THIS** season, with the percentage of their games won this season taken into account.

Where a **player** is '**NEW**' to the league and has not yet played any matches, their handicap will be the middle of that of the other players in their team.

Where a **team** is '**NEW**' to the league and have not yet played any matches, each player will be assigned a handicap that is the 'mid-point' for that division.

The competition organiser can/will adjust an individual's handicap if the player was 'playing' in a division 'below' their standard. Where a **player** is '**playing UP**' they will carry with them the handicap assigned to them by the competition organiser (currently Aubrey Henry).

A list of all players that I am aware of (as at **03/12/2016**) and their individual handicap is attached below.

Aubrey Henry (01283 547939)
