						Result									378	378

⑪ **Shootout** Alan Steiner A v Y Julian Isla — 21 19

Result Hustlers **beat** Iconic **by** 0 **Winner** Hustlers ⑥

Signed _____ _____

If the difference between handicaps is greater than 15

Difference	16	17	18	19	20	21	22	23	24	25	26	27	28	29
Use this instead	15	15	16	16	16	17	17	18	18	18	18	18	18	18

⑫

In the event of a draw a shootout is required, the player with a positive difference should start with that score. Play one game to 21 win by 2

1. Group No.	7. Enter the Leg scores – first player to 21 – change serve every 2 points (no need to win by 2!)
2. Date	8. Calculate the Diff per game by calculating the difference and if above 15 look it up (12) then multiple by 2. Enter 0 for the lower handicap player.
3. Home Team	9. Once the game is complete add the Leg scores together and the Handicap per game
4. Away Team	10. Keep a running total for reference
5. Player / handicap	11. If the scores are level – enter the Shootout Names – start the game with the players Diff. per Leg. In this example Alan would be 0 – Julian would be 11 (12-1) complete to 21 win by 2. The server in this example would only get one serve at the start of the game as they are starting at 0-11
6. Winner	12. Use the difference table to calculate the difference per Leg when it is over 15
