

Each **PLAYER** will carry **THEIR OWN** individual handicap. The **TEAM** handicap will therefore be calculated by adding together the handicaps of the **3 players playing ON THE NIGHT** (plus the handicap for the doubles).

The individual player handicaps have been calculated as follows: Handicaps are based on the division played-in during the **previous** season, and the % games won in that division. If a team is promoted/relegated, the handicap is still based on the above. If a **player** did not play in the league last season (i.e. no stats available) then their handicap is based on the division that they are playing in **THIS** season. In all cases, the competition organiser reserves the right to adjust an individual's handicap if the formula assigns an inappropriate value.

Where a **player** is '**NEW**' to the league and has not yet played any matches, their assigned handicap will be the middle of that of the other players in their team.

Where a **team** is '**NEW**' to the league and have not yet played any matches, each player will be assigned a handicap that is the 'mid-point' for that division.

As soon as statistics become available to gauge the actual standard of **new** players, the competition organiser will review and, if necessary, adjust their handicap for the remainder of the competition.

Where a **player** is '**playing UP**' for a different team in their club, they will still carry with them **THEIR OWN** individual handicap.

A list of all players that I am aware of (as at 19 **Dec 2017**) and their individual handicap is included below.

Organiser: Graham Hesketh (07951 308685 – graham@gbh.clara.co.uk)
