

Sports Flooring Systems **London**

LONDON SPORTS FLOOR

Performance and Durability

The London area-elastic sports floor system is based on factory assembled elastic beams which support a counter floor and load distribution panel. This provides a stable base for your choice of playing surface.

The London system meets the requirement of BS EN 14904 and is Sport England compliant.

It is particularly suitable for installations with underfloor heating thanks to the space created between the elastic beams.

The London system can be packed and levelled, thus eliminating the need for a levelling floor screed therefore no screeding cost, making it a cost-effective solution.

London Benefits

- Reduces risk of injury and premature fatigue
- Suited to both sport and non-sport activities
- Durable and easy to maintain
- Choice of surface finish
- Underfloor heating compatible
- Meets the requirements of BS EN 14904
- Sport England compliant

Flooring Surfaces, Accessories & Services

Whichever Dynamik sports floor you select, you're sure to choose a winner be it a hardwood, synthetic or portable sports floor system. Dynamik has the right solution for new build projects as well as refurbishments.

Sport Vinyl

Sport Linoleum

Seamless Polyurethane

The London sports floor system provides a high quality ply board surface that can accommodate a choice of surface finishes. Typically, these include solid vinyl, point-elastic vinyl, linoleum, rubber and seamless polyurethane.

We can advise you on the most appropriate finish for your facility.

London Technical Specifications	
Ply board	12mm
PE foil layer	0.03mm
Counter floor module	16mm
Elastic beam	36mm
Minimum Construction Height	64mm
Weighted Impact Sound Improvement	dLw 20

Mean values according to BS EN 14904:	
Shock absorption:	67%
Vertical deformation:	3.0 mm
Rolling load:	✓
Ball rebound:	97%
Slip resistance depends on surface finish	

Sports Flooring Accessories & Services

We've developed our range of flooring accessories to give you that reassurance, and to guarantee you the excellence that comes from painstaking attention to detail.

Movement/Expansion Joints

Apparatus Covers/Frames

Sports Flooring Line Marking

Environmental Sustainability

As part of our commitment to reducing our environmental footprint wherever possible we select recycled or recyclable materials. Our wood floors use an engineered board, which typically reduces the amount of hardwood used by 80% whilst also enhancing the performance and longevity of the floor.

More Flooring Systems from Dynamik Sports Floors

Athen Sports Floor

The Athen sports floor is our flagship area elastic sprung sports floor, with consistent ball bounce across the floor and accommodates a wide range of synthetic playing surfaces.

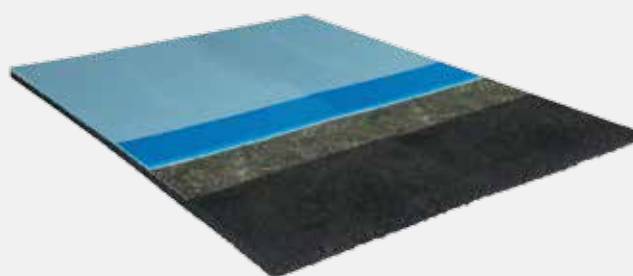

Helsinki Sports Floor

Using the same elastic layer system as Athen, our Helsinki sports floor gives the same ideal consistency of ball bounce, and is finished with a hardwood wear layer.

Academy Sports Floor

The Academy system is a cost effective solution which we would recommend for installations where under floor heating is to be installed or where the sub-floor is uneven.

PU Sports Floor

A polyurethane sports floor looks stunning, thanks to its seamless wall-to-wall construction. That also means there are no joins to fail in later years. Polyurethane can be repaired seamlessly and invisibly.
